

## Saving Environment for Future Generations

The Earth still holds the title for the only inhabitable planet. It's been a paradise for us humans for well over 2.5 million years. We, however got used to it, took it for granted, started exploiting the resources it holds. At this rate the end of the world will become even more imminent.

"Sustainable development requires human ingenuity; people are the most important resources." Humans are the most evolved animals on Earth, as the force that can alter its future, we have a responsibility towards the Earth and its future. We don't need to just save the Earth for the future but teach others, spread the word to the future and maintain our duty as long as we live.

First things first, don't waste pretty much anything. Every single resource, replenishable or not, has a depletion point. Save them. Next thing we need to find out as a whole is where we want to throw away the resources we don't want anymore, that is waste materials. Instead of throwing it absolutely anywhere, we should use the bins and segregate the waste. Segregation is a crucial part of waste management and the key to reduce pollution. Finally, we should try and replenish the resources we use. This is because even without wasting them we still use a ridiculous number of things taken off or out of the Earth.

Trying and maintaining the demands and stopping depletion at the same time is the key to success. It sounds easy, but its miles away from that unless we all work together as a whole.

Shreyas Roy  
XI-A

## "In the end our society will be defined not only by what we create, but by what we refuse to destroy"

A sustainable city creates a social, environmental and economic impact through urban planning and city management. The global population is constantly growing. Medium and small cities, those which nobody knows about, are going to grow faster in the future. Our century is about global cities. We need to build modern, sustainable cities to facilitate everyone. We and especially the future generation need new, intelligent urban planning that creates safe, affordable, and resilient cities in order to lead sustainable lives. In order to make cities sustainable, main aspects that can be focussed upon are- public transportation, Walkable and bikeable neighborhoods as to reduce carbon emissions throughout a community is to have citizens ditch transit altogether, Vehicle charging stations, Solar farms, Green buildings. A lot of people are saying that cities are where we will be mapping out our collective future. Why is this? Teemu Alexander Puutio at the University of Turku in Finland says, "Cities excel in fostering community attachment, which is found in open spaces ripe with social offerings, accessible educational systems, and opportunities for civic involvement." We're moving from a generation who gave little thought as to the built environment and accepted housing that was neither pleasant to look at, nor to live in or around, to a new century where there's a real desire for housing that's affordable, flexible, and places community at the heart of its thinking. Thus, its safe to say that SUSTAINABLE CITIES are a REQUIREMENT, A NEED of the future!

- Sanaa Goel  
XI-B

## Sustainability- the only way forward

What does the word sustainable mean? It means fulfilling our needs without compromising those of our future generations.

But are we actually doing that?

Statistics say that almost 70% of global waste, and 80% of world energy consumption comes from urban areas.

Delhi NCR by itself has been tagged as a gas chamber due to the high levels of pollution. This pollution is caused due to vehicular emissions, stubble burning, industrial waste etc.

So, what are we leaving behind as a legacy for our future generations?

We should actually do something if we WANT a future generation at all!!!!

Here are a few ways to reduce global waste and our energy consumption at the individual level.

- Carpool- This would reduce emissions and in turn reduce pollution.
- Go plastic free- That is the top need of the hour.
- Protect wildlife from extinction- top down everybody is important in the food web.
- Go environment friendly- Buy articles that have not harmed the environment.
- Lower your carbon footprint- This means that you should lower the amount of greenhouse gases that your actions have or will release into the atmosphere.
- Zero waste- Try the 4Rs of reduce, reuse, recycle and recover.

To become a sustainable city, the infrastructure needs a major revamp like.

- The public transport system should be fully operational and capable of bearing the weight of the population of the city.
- Electric vehicles should be promoted. Charging stations should be set up so that the EV network runs efficiently.
- Solar panels should be set up to meet the energy requirements for buildings, offices, and streets.
- Organic farming, even in urban areas, should be promoted.
- Rainwater harvesting and other conservation methods for saving water should be emphasized.
- Parks and other public places should also go green.

The top priority should be WASTE MANAGEMENT. Proper awareness about waste disposal should be spread among the people.

When we take time for any (or all) of the above activities, only then will we become a sustainable citizen living in a sustainable city.

As George Bernard Shaw once said, "Progress is impossible without change, and those who cannot change their minds cannot change anything."

So, are you ready to change your mind???

Shivansh Sachdeva  
XI B

## Climate Action And Smart Sustainable Cities

It is rightly said "The best way to predict the future is to create it." Climate inaction and unsustainability of cities are critical issues and require immediate attention. The sustainable development goals 11 and 13 aims to make cities and human settlements inclusive, safe, resilient, and sustainable, and to combat climate inaction and its impacts, and therefore strengthening resilience and adaptive capacity to climate related disasters, respectively. The consequences of climate change and unsustainability of cities are interdependent. Climate change being a global phenomenon, largely impacts urban life, leads to rise in global temperatures, causes water levels to rise, increases the number of extreme weather events, and increases the spread of tropical diseases. All these have impacts on cities' basic services, infrastructure, housing, human livelihoods, and health. At the same time, cities are a key contributor to climate change, as urban activities are major sources of greenhouse gas emissions. Estimates suggest that cities are responsible for 75 percent of global CO2 emissions, with transport and buildings being among the largest contributors. Only with a coordinated approach and action at the global, regional, national, and local levels, can success be achieved. It is essential, therefore, to make cities an integral part of the solution in fighting climate change. Many cities are already doing a lot by using renewable energy sources, cleaner production techniques and regulations or incentives to limit industrial emissions. Cutting emissions will also reduce local pollution from industries and transport, thus improving urban air quality and the health of city dwellers. Through concerted efforts we can take action to mitigate these impacts and make our cities more sustainable. One of the most effective ways to address climate change is by promoting sustainable transportation. With a high percentage of carbon emissions resulting from vehicles, cities can opt for mass transit systems, which will reduce carbon emissions and make the cities habitable. In addition to transportation, city planners can focus on creating sustainable buildings. This includes implementing green building practices such as energy-efficient designs and renewable energy sources. Green buildings consume less energy, are less expensive to maintain, and promote a healthy living environment. Another way to promote climate action and sustainability is through waste management. Cities can encourage recycling by introducing policies to minimize waste and increase recycling rates. Composting is another way to manage waste and protect the environment, as it reduces greenhouse gases and generates organic fertilizers that promote plant growth. Furthermore, the preservation of green spaces can enhance the sustainability of cities. Trees, parks, and gardens can help purify local air, reduce the urban heat island effect etc. Sustainable cities are cities that strive to improve the quality of life for their inhabitants, minimize unnecessary waste and reduce their carbon footprint. These cities promote sustainable development by fostering environmental awareness, promoting green policies, and supporting innovative solutions to address climate change. In conclusion, climate action and sustainable cities will become increasingly critical in the years ahead as we respond to climate change. By promoting sustainable transportation, sustainable buildings, waste management, and green spaces, cities can work towards a more sustainable future. We must ensure that urban development and growth prioritize environmental sustainability, which is essential to the health and well-being of our cities' inhabitants and the planet. They say "Environment is no one's property to destroy; it's everyone's responsibility to protect", and hence as responsible citizens, we must advocate for green policies and support sustainable practices in our everyday lives.

Saanvi Vashishtha  
XI-A

## Spread the Greens!

A flourishing life on land is the foundation for our life on this planet.

Forests cover nearly 31 per cent of our planet's land area. From the air we breathe, to the water we drink, to the food we eat—forests sustain us. They are home to more than 80 % of all terrestrial species and more than 1.6 billion people depend on forests for their subsistence. Forests also play a critical role in mitigating climate change because they act as a carbon sink—soaking up carbon dioxide that would otherwise be free in the atmosphere and contribute to ongoing changes in climate patterns.

But forests around the world are under great threat, jeopardizing these benefits. The threats manifest themselves in the form deforestation, habitat encroachment and crime against wildlife. Deforestation and habitat encroachment not only deprive people of essential nutrients, they are the main sources of transmission for emerging infectious diseases. A large proportion of diseases are transmitted from wildlife to people. This occurs when humans invade natural habitats and disrupt ecosystems. Crime against wildlife, poaching, and illegal animal trafficking not only threaten the health and biodiversity of the ecosystem, they can also disrupt human health, economic development and global security.

Before we panic, it's worth reminding ourselves, we can fix this as it is all about working together to protect, restore and promote our planet's plants, insects and animals. We can recycle and reduce the consumption of paper and plastic; reforest the burned land and plant fast-reproducing trees. Composting food scraps can reduce climate impact while also recycling nutrients. We as responsible individuals can also volunteer with street animal organizations or shelters to help sustain diversity and save lives of animal species by volunteering in organizations. Thus, by working together we can protect, restore and promote the sustainable use of terrestrial ecosystems, sustainably manage forests, halt and reverse land degradation, combat desertification and halt biodiversity loss.

The future is in our hands, let's take a stand to preserve the land.

Kamakshi  
XI

## Penning Their Thoughts Towards a Sustainable Future

### 'A New Life to the Planet'

Junk piles up across the street,  
But people walk and pass by their feet.  
A forest is every animal's need,  
But trees are felled due to our greed!  
There must be something we still can do,  
The world is crumbling! Get a clue!  
Don't brush off, for, mother nature still counts on you,  
Give the planet a life that is brand new!

Tanisha Tyagi  
IXA

### 'The Blind Reality'

The Earth is a plethora  
Of beautiful creations,  
Home to flora and fauna  
And fish beyond imagination

But all that is changing,  
For greed blinds the heart,  
Men now fall to scavenging,  
And have forgotten their part

The need for power has risen,  
The need to expand is here,  
Nature is what they must imprison,  
To bring to life the plans they hold dear

They don't see the truth,  
For they refuse reality,  
They lie to the youth,  
To justify their mentality

Huge cities have been built,  
More have we been demanding,  
But Mother Nature will never wilt,  
Till we come to an understanding

Humans must now begin to see,  
That to co-exist they need sustainability,  
For right now, as for you and me,  
We are living in a blind reality.

Enya Chandra  
IX A

### Our Shared Responsibility

There's no time to waste,  
No more room for delay,  
It's time to take action  
And make sustainability our way.  
We must reduce our waste,  
And choose renewable energy,  
It's time to make a change  
And help create a better world for all to see.  
Let's work together to make this happen,  
We can make a difference in our own land,  
It's time to start the journey  
Towards a sustainable world for us to share.

Trisha Mehra  
IX-B

### Sustainable Cities: A Step Towards a Brighter Future

As the global population increases and the demand for resources intensifies, the need for sustainable cities and communities is more urgent than ever. Sustainable cities are designed to reduce waste, conserve energy, and use natural resources responsibly. This helps promote a healthier environment, reduce pollution, and improve the quality of life for people living in urban areas. Sustainable cities are designed to promote mobility, public transportation, green spaces, and renewable energy sources. They also prioritize environmental protection and health, while providing access to clean air, water, and food. Additionally, they strive to create equitable, livable, and resilient communities by promoting economic development, job creation, and social inclusion. Overall, sustainable cities and communities are key to creating a brighter future. By investing in sustainable cities, we can ensure that future generations have access to the resources they need to thrive.

Priyal Govil  
IX-B

### The Most Precious Gift

Nature is the most precious gift given to us by god. To save this and to take its utmost care we must start by making our cities greener. The traits our cities should hold are - it should be eco friendly, it should be more sustainable, it should support green spaces and should be urbanised. To make our cities greener and to fulfill these traits/ideals we must ensure the active participation of the public. We can start by campaigning, reducing, reusing, reaching, carpooling, planting trees, reducing energy consumption, finding alternatives to resources etc. The eco-friendliness of the cities reduce air pollution and CO2 emissions, they enhance air quality index as well as protect natural resources. These all qualities of greener cities led to a sustainable future as well as the economical, physical and social progress also increases.

Akshita Sharma  
IX-C

### SDG Goal 11: The path that leads to a better future for the growing population

SDG 11 makes cities and human settlements inclusive, safe, resilient and sustainable!

A very good day to my readers! Did you know that more than half the world's population lives in urban or city areas and that by 2050, 7 out of 10 people will live in urban areas or cities. Now there isn't anything inherently wrong with urbanisation and it can be very good if it's handled properly.

Unfortunately, a sad reality of the bustling city life is the amount of pollution created in it which is obviously very harmful for the environment a lot of green houses gases are produced from cities and half the world's population breaths air that 2.5 times more polluted than the standards set by the world health. Now because of the rapid urbanisation which is, don't get me wrong! very good! for a developing nation but it has indeed brought its fair share of problems inadequate basic services and infrastructure and unplanned urban sprawl (the rapid expansion of cities and towns) and due this problems the urban areas can become more prone to natural disasters.

Main urban challenges are-

- pollution
- income gaps
- social and economic inequalities
- water supply and sanitation
- natural disasters

I am sure we all our on the same track that we should make our urban spaces more resilient environmentally conscious. A lot of developing nations have rural areas or slum areas where a lot of people aren't given the most basic resources of like such as clean water a roof over their house not having the proper nutrient rich food needed for the human body and what most modern urban areas don't recognise is rural-urban areas migration is driven by the prospect of greater employment opportunities and the hope of a better life in cities but with an increasing pollution density can create many problems a very serious example is Poverty. Estimates are showing that 40% of urban inaction is taking place in slum areas creating a misbalance and creating unsanitary conditions that facilitate the spread of disease. The world's population is increasing. UN has set up 10 targets to create action to make cities and communities more sustainable! Now obviously i can't talk about all the goals so here's a brief on all of them:-

1. Safe and affordable access to a house with all the basic needs and wants of people and upgrading slums
2. transport systems being made available to all which means improving our roads, expanding the public transport with special attention to the disabled children pregnant people and older people
3. Enhancing inclusive and sustainable urbanisation and capacities for participatory integrated and sustainable human settlement planning and management in all countries
4. Protecting the culture and heritage sites for the future generation
5. Reducing the deaths and people being affected / caused by natural disasters and decrease the economic losses relative to global domestic product caused by the disasters
6. Paying close attention to the environment and reducing the adverse per capita environment impact of cities
7. Providing accessible green and public places in particular for some people like elderly disabled children women
8. Supporting the strong positivity economic social and environmental by making the areas stronger nationally and regionally
9. Implementing policies for inclusion resource efficiency and disaster risk reduction
10. Give our aid to the other less developed countries including through financial technical assistance.

The actions that you as a citizen can take our many such using the public transport or a bike, reduce and manage food waste, respect and walk in dedicated space for pedestrians, help the people in need if you have the power and influence you should do your best to help.

All of these goals are to be achieved by 2030 and I have zero doubt for the goals ad that we shall achieve them...Thanks for reading!

Lineysa Surana  
IX-C

### SDG-11: Make cities and human settlements inclusive, safe, resilient and sustainable

Recently, many cases of exclusivity were raised, and other circumstances led to the formation of the sustainable development goal-11. SDG-11 aims to renew and plan other human settlements in a way that offers opportunities for all, with access to basic services, energy, housing, transportation and green public spaces, while reducing resource use and environmental impact. Case studies and research reports tell us that today more than half the world's population live in cities. By 2050, an estimated 7 out of 10 people will likely live in urban areas. Due to the climatic changes taking place nowadays, and high population of people, high concentration of infrastructures, housing and economic activities, cities have indirectly become estranged to natural disastrous impacts. Crucial is what we can call building urban resilience with the aim to avoid human, social, and economic losses whilst improving the sustainability of urbanisation processes is needed to protect the environment and mitigate disaster risk and climatic changes happening. According to data and statistics- The world's cities occupy just 3% of the earth's land, but account for 60-80% of energy consumption and 75% of carbon emissions. Visionaries have never once stopped heeding to their vocation of remaining faithful to their one way of making an appearance and that is of having a vision for cities. More than half of the world's inhabitants live in cities and this migration trend is expected to continue, affecting the population of the particular area as well. Many targets have been put forth for SDG-11, one of which is Target 11.7: By 2030, provide universal access to safe, inclusive and accessible, green and public spaces, in particular for women and children, older people and people with disabilities. This target will do nothing more than contribute to the NCD target in SDG3( ensuring healthy lives) by providing places for people to be physically active. As land becomes more and more precious, green and public spaces are converted to residential housing and businesses. This is why Target 11.7 that addresses green and public spaces is so important. Without strong commitment from governments to preserve, protect and value these spaces they will be lost forever!! Undoubtedly, there are many challenges ahead in SDG-11. Cities will need solid implementation plans and support in order to realise the targets. Innovative solutions are needed to help create people-entered cities where citizens are involved in influencing how they live and interact with their community. Civil society can play an equally important role in bringing together local people and governments. SDG-11 can go a long way towards contributing to the SDGs. Like many other goals, the identified targets need to be tangible, concrete and measurable. The targets have the potential to impact real change across many of the SDG's- Let's make sure they have the power to make a difference!

Naina Batra  
IX-C

## Empathy is how kind-hearts breathe!

The other day my friend Agastya and I were talking. His tone was different than usual days. After asking a couple of times he answered, 'I have some very sad news to share. My grandfather has died. That means his body has stopped working, and we won't get to see him again.' As I listened to Agastya describing his sadness, I could feel his pain viscerally. I knew it's not going to be easy as he was attached with grandpa. I decided that I would speak to him every day and help him heal. I shared my class notes with him and what I did the whole day so that he feels that he is part of my life. I also made some sandwiches for him and shared mom baked muffins so that he feels special. Since we live nearby while on a visit I saw a pair of kittens in a corner of his backyard which he did not pay attention to. I asked to name them and play with them, there I saw him smiling after a long time and I smiled back.

The act of empathy is two-fold: First, we must put ourselves in someone else's circumstances to feel their pain; second, we must use the experience to fuel action. The recent Pandemic has taught us in order to lead towards a better tomorrow; we must embrace empathy as a verb. We need to lean on empathy to inspire action. Imagine the future world we could create when the world feels unpredictable and chaotic, finding tangible ways to do good and make things better for someone else which can be a source of comfort.

Ranveer Luthra  
VIII-C

## Sustainable is about energy, economy and equity

The human settlement comes at the cost of the environment and thus impacts biodiversity! Nowadays, as urbanization has increased and because of our greed, it is affecting the environment and leading to the destruction of habitats. Urbanization often leads to deforestation and habitat destruction, which impacts biodiversity and thus leads to climate change. It also has increased the demand for energy, which may not be left for the future. For our needs and greed, we are wasting all of the environment's resources creating a scarcity of resources for the future.

In the hilly areas and countryside, as there is less human settlement, the environment is less affected, but in cities due to increasing urbanization, the environment is impacted drastically. On interviewing people in my neighbourhood, they also agreed that sustainability is all about ecology, economy, and equity and that the needs of humans affect much more of the environment, impacting biodiversity and creating a scarcity of resources for the future. There might be a time in the future when there would be no resources left.

Mayank Sharma  
VIII-B

## The Economics of Sustainable Cities and Communities

Sustainable cities and communities are rapidly emerging as a popular approach to urban development, offering economic benefits such as improved air quality and reduced energy consumption. However, the economic advantages and disadvantages of these initiatives must also be considered. On one hand, sustainable cities and communities can bring economic benefits through the creation of jobs in green sectors, such as renewable energy and sustainable transport. This can also help to attract investment and boost tourism. Sustainable cities can also reduce costs related to energy consumption, water and waste management, and improve public health outcomes by reducing air pollution. However, on the other hand, there are some economic disadvantages. The upfront costs associated with retrofitting buildings and infrastructure can be considerable and may not be feasible for some communities. Additionally, the lack of public and private funding for sustainable initiatives can be a barrier to progress. Overall, it is important to consider both the economic advantages and disadvantages of sustainable cities and communities to ensure that they are implemented in a way that is economically viable and beneficial to local communities.

Nysha Nilanjan  
VIII-B

## Sustainable Cities and Communities

Sustainable cities and communities are the ones that save resources for future generations and walk towards improving the present. Their main focus is to conserve the environment and make eco-friendly cities and communities. They tend to save non-renewable resources and reduce pollution of all types. The importance of sustainable cities and communities is increasing due to the high concentration of people, infrastructure, housing and economic activities, cities are particularly vulnerable to climate change and natural disasters impacts. Building urban resilience is crucial to avoid human, social and economic losses while improving the sustainability of urbanization. We can create sustainable cities easily by planting trees, using cycles for short distances, using six hours, segregating waste, using solar energy, windmills and many more. So, let's unite to make the world a better place...

Preesha Jain  
VIII-A

## Concrete Jungles to Green Cities

Concrete jungles are usually present in cities and urban areas, and are known to have many large, unattractive and modern buildings. Such areas also contain industries, making the city even more unattractive, as industries cause pollution, and polluted areas are undesirable to live in. Although this may be the case, many people still live in concrete jungles, as these areas have a high economy and job opportunities. Green cities, also known as sustainable cities, are found in places with less population, or non-urban cities. There are many cities in the world that are sustainable, though. Green cities are places where one can find nature, and not live in an industrialized space. Such cities have conservatories for land and aquatic animals. Botanical gardens are also found in such places, but they may be found in concrete jungles too. In order to convert concrete jungles to green cities, one must learn to be sustainable, and take one step at a time, for a green and clean environment. Such steps may include planting a garden, reusing plastic, segregation of waste, energy and water conservation, and many more. In order to take bigger steps for the conversion of concrete jungles to green cities, install windmills for wind energy; solar panels for solar energy, and dams for hydroelectricity. These are only a few steps one can take to make their city a green city.

Srishti De  
VIII-B

## The World Needs a New Warrior

I am a warrior  
The warrior for the night,  
I plant trees and flowers to make the world bright.  
If I had a Genie,  
My wish would be to make the world greener,  
For the ones in the future won't struggle to clean her  
I do my part to make the world sustainable  
If I did all there's, we would be so much more capable  
I tell myself at night  
It's time to take off your armour  
You fought well today, dearest warrior  
Tomorrow you will come back braver  
and be the one to save her.

Vaydehi Komal Dhingra  
VIII-A

## Recycling takes a little effort on our part, for a big difference in our world.

In the last couple of decades, plastic consumption has increased and so has waste production, creating a lot of soil and land pollution. Dumping grounds are overflowing with garbage. Apart from that plastic waste is also being dumped in the oceans leading to water pollution. While efforts are being taken to reduce pollution, we need to follow certain things that may further help in dealing with the situation.

1. Separating dry and wet waste.
2. Following the 6Rs- Reduce, Reuse, Recycle, Rethink, Refuse, Repair
3. Avoiding usage of plastic
4. Planting more and more trees
5. Carpool-a joint effort indeed
6. Learning to coexist

Darsh Singhal  
VIII-A

## A Society We Desire

An inclusive and ethical society is what we want,  
One that is secular and isn't gaunt;  
A strong and buoyant society is what we desire,  
One that is moral and learns to admire.  
Well, here's the chance.  
A chance to be heard and to know what's wrong.  
A chance that people might belong.  
Are we in trance?  
Socially boycotting people, we despise.  
Do we have the right to criticise?  
We must thrive as one.  
Build a community and raise it from the ground,  
One that isn't bound.  
To the social evils that plague the town.  
Let us all strive towards a better world,  
For the future generations and all to come.

Sharanya Agarwal  
VIII-A

## Recycle It!

We should recycle the waste on our part.  
To make the future a great start.  
If we recycle, we can find a solution.  
If we don't, we add up to pollution.  
We can recycle, repair, reduce and reuse,  
If we can do this, then why do we need an excuse?  
If we can increase pollution, then we can also work for a revolution.  
If we can stop pollution and think this far,  
Then we can also switch to electric cars.  
If we can recycle then why are we thinking, is it that frightening?

Atharva Singh  
VIII-A

## Stars

When I look up and stare,  
I relish the sight of those sparkly specks up there.  
Then I wonder how every one  
Is as big as the sun-  
Yet they look so tiny  
But if they were closer,  
They'll be just as bright and shiny.  
Stars are magic in the sky at night, that I love,  
I admire them all sparkling above.  
And I wonder how this all came to be,  
Every little sparkle is just suspended and free.  
At the end of the night,  
I think while gazing,  
As the sun's blazing,  
That these stars are amazing.

Srishti Ray  
VIII-A

### 'Just Being Mindful'

One has to be cautious and mindful of one's actions. Does this statement ring a bell? Hope it does! For, if we continue being careless and carefree, the price has to be paid. Our planet would soon perish if we continue to harm it. Are tremendous measures the need of the hour? Surely they are! But, even our small acts of contemplation like, 'Thinking before shopping' or 'Being water-wise' would make a huge difference. As young learners, simple acts like refilling the pens and not buying another would make a difference. The goal is to focus on need rather than greed to avoid consumerism.

Kavya Srivastava  
VII A

### 'The Friends of the Ecosystem'

Once the world was stunning!  
The sky was with birds chirping,  
the forests with lions roaring.  
The wind with plants playing,  
oceans with fishes swimming.  
People were not demanding.  
Then the Greed of humans conspired!  
Many species extinct, and forests acquired.  
Oceans polluted and resources expired-  
Yet people unhappy and disconnected,  
for unknown monster with souls retired;  
Now we need to regain revival,  
Stop hunting and poaching for Earth's survival!  
Be the friend of ecosystem and not rival,  
Something those earlier generations put in archival.

Samridhi Nauharua  
VII A

### 'What Change Can I Bring?'

Whenever I go out, my heart bleeds...  
Watching leaves burnt and dry,  
birds not able to fly;  
Animals scared with noise so loud,  
air, full of smoke filled clouds.  
All around pollution is omnipresent,  
Let's get together and prevent.  
Save plants and grow more trees,  
more plants for evening breeze.  
I ponder, what change can I bring?  
Saving resources is the first thing!  
More of everything is a new trend,  
We need to put this to an end;  
Reduce, reuse and recycle the things-  
This world belongs to future kings.  
Saving food and water has a good effect.  
A small effort to make the world perfect!

Samridhi Nauharua  
VII A

### 'Our Need or Our Greed!'

Planet earth is filled with trees and beautiful seas,  
But, mother earth is dying with no one around trying!  
Forests are everywhere for animals to breed,  
But, the trees are gone because of our greed!  
There must be something we still can do,  
But do you still care about what's around you?  
We all need our earth, yes, animals too!  
All it takes is one thoughtful action from me and you!

Adya Arora  
VII A

### 'Be Sustainable'

Upgrading slums,  
it's an idea that has all thumbs.  
Sustainable and affordable transport systems,  
a plan that gets creditism.  
Safeguarding world's heritage  
and preventing any wreckage.  
National and regional development  
should have no dishevelment.  
So, be sustainable  
with a reason to be explainable!

Nyasha Arora  
VII B

### 'Simple Steps Towards Greater Success'

Like how drops of water,  
and grains of sand,  
make up the sparkling ocean,  
and the verdant land.  
So, the minor deed,  
builds up and takes the lead.  
So, the major change,  
Is spread in a wide range.  
The simplest steps,  
when are addressed,  
lead to greater success,  
than ever witnessed.

Tvisha Chandra  
VII B

### 'My Dream City'

My dream city is a clean city,  
People throwing garbage in the bins  
And not allowing filth to come in!  
My dream city is a solar city,  
People using solar energy to light the bulb,  
To cook the food and make life good.  
My dream city is eco-friendly,  
People follow the magical words-'Reduce', 'Reuse', 'Recycle', kindly.  
My dream city is green city,  
People grow a tree  
And make the environment pollution free.  
My dream city is a sustainable city,  
People use water responsibly.  
My dream city is a developed city,  
People ready for innovations,  
Yet keeping the city useful for the next generations!

Samudra Rai  
VII B

## SDG 11- SUSTAINABLE CITIES AND COMMUNITIES

Sustainability is essential for this world that is increasing and advancing in many technologies as we tend to forget to take care of our nature. That is the most important reason to choose a sustainable path, observing this problem the UN (United Nation) introduced the SDGs (Sustainable Development Goals) to the world in 2015 to be accomplished by the world in 2030. SDG 11 focuses on building sustainable cities and communities that is to make cities and human settlements inclusive, safe, resilient and sustainable.

Solving problems like:

- slums
- local disaster risk
- Untreated waste and wastewater
- Inconvenient public transportation

The SDGs play a very important role in every individual's life to make their surrounding communities safer, convenient and resilient. Across the globe, companies are tapping into this technology to transform dense urban cities with adequate plant growth to curb air pollution and make the city beautiful. Very recently, China flaunted Asia's First Vertical Garden that has the ability to produce 60 kg of oxygen every single day. These small steps taken by various countries can help making a world a better place to live and following SDG 11

Pranshi Anand  
VII-C

## THE GLOBAL GOALS

"Sustainable development is the development that meets the needs of the present without compromising the ability of future generations to meet their own needs."

Sustainable Development is the development that meets the needs of the present generation without excessive use or abuse of natural resources so that they can be preserved for the next generation.

The need for sustainable development arises to prevent environmental degradation. It will check the overexploitation and wastage of natural resources. It will help in finding alternative sources to regenerate renewable energy resources. It ensures a safer human life and a safer future for the next generation.

In order to do sustainable development, awareness must be spread among the people with the help of many campaigns and social activities. People can adopt a sustainable lifestyle by taking care of a few things such as switching off the lights when not in use; thus, they save electricity. People must use public transport as it will reduce greenhouse gas emissions and air pollution. They should save water and not waste food. They build a habit of using eco-friendly products. They should minimise waste generation by adapting to the principle of the 3 Rs which stands for reduce, reuse and recycle.

Pramyarupa Rath  
VII-C

## Cities of the Future

Cities of the future, shining bright,  
Built on sustainable principles, all just and right.  
With green spaces and clean air,  
A harmonious existence, without a care.  
Transportation that's efficient and fast,  
Connecting people, making life more vast.  
Access for all, to opportunities and more,  
Eradicating poverty, forevermore.  
Inclusivity and diversity, a cornerstone,  
Creating a society where all can belong.  
A safe and healthy environment, for one and all,  
SDG 11, a goal, for the betterment of all.  
Let's work together, towards this goal,  
A future that's sustainable, for young and old.  
Let's make our cities, a place to thrive,  
With SDG 11, let's make the world come alive

Shazeb Siddique  
VII-C

## Life of a Student

The life of a student, full of wonder and grace,  
With dreams and aspirations, they set their pace.  
Early mornings and late nights, they spend,  
With textbooks and notebooks, their minds bend.  
Exams and assignments, a constant test,  
But with determination, they do their best.  
Friendships and connections, they make along the way,  
Memories and experiences that will stay.  
With each new day, they learn and grow,  
Their knowledge and skills, with time will show.  
The life of a student, filled with ups and downs,  
But with hard work and dedication, they wear the crowns.  
With graduation, a new chapter begins,  
As they take the world, with their hearts and grins.  
The life of a student, is a journey long,  
With opportunities and challenges, they stay strong!!

**'The Litter Makes the Future Bitter'**

Littering causes land pollution as well as water pollution. Waste from every nook and cranny ends up in the landfills or entering the water bodies. The cattle may eat that waste and get choked to death. Landfills can produce a lot of odour and all types of contamination. Convenience is the greatest cause of landfills. A major problem is that nowadays, some people still cause water pollution and only 7% of our earth's surface has freshwater; the rest is salty water. If we continue to pollute water, even the salty water will perish. It would be challenging and a costly affair to filter and drink salty water, thus, leaving no freshwater for us to drink. Even if we try to resort to the glaciers to get excess freshwater, the water level will increase and cause floods, Tsunamis and destruction everywhere; this may endanger numerous lives. The litter will make our future bitter.

Advait Vivek  
VI A

**A Dream?**

Few years back it would be a dream to see all the trees green with peace being the theme, Wanting it to be the best for all without hunger and war at all.. Where nobody is different and everybody is one in all with no judgment we will be called, Health, equality and education stays.

It is time to get out of this maze.. If recycling exists our life will be as easy as biting a crisp! Peace and partnership will make a difference in the AQI index Our earth is cracking and blistering with heat as all greenery is still incomplete.. We all need clean water to survive and to waste it isn't a choice.. Let's use the thing that can be recycled or our world ending will be the next article!!

Vanya Khokhar  
VI-B

**Let's Sustain Sustainability**

"Sustainability is here to stay, or we may not be"-Niall FitzGerald Sustainability is a term everyone has heard about. Whether it's buying eco-friendly or going electric, we all have been motivated to work towards sustainable development goals for betterment of humanity. While these activities are no doubt critical, one aspect of paramount importance is: Just how seriously are we taking sustainability? Although sincere efforts have been made in past, a hypocritical mindset still persists. Politicians make fake promises to gather votes with null results. This shows the main problem standing in the way of a better world: Unwillingness to make the change. To conclude, change is easy, but to sustain this idea, consistency is the key.

Tvisha Kaur - 5C

**Green living is the best living**

Green living is the best living because green living is today not fashionable but a necessity. Studies show that younger generations have more health issues today due to bad air, water and land.

There are so many ways to live a green life, but I am going to tell you some basic ways –

Climate change is today one of the world's most pressing issues. In the 1960s, the level was 0.6 ppm per year, today it is 2.3 ppm per year. Most of the energy that you use today comes from burning fossil fuels. Like it is to drive cars, to produce electricity or to run gadgets. you must choose alternatives to decrease your dependence on fossil fuels. You can switch to alternatives like renewable energy sources such as. solar energy

Use public transports such as trains, buses, high-speed rails and even carpool as much as possible. Though your car is much more comfortable and readily accessible, a car typically releases some 4.6 metric tons of carbon dioxide per year. If you want to engage in green living, then you should opt for public transportation when you can. For example, to go to work, to visit places abroad and to travel short distances.

Another reason why the amount of carbon dioxide has been increasing in the last decades is because of mass deforestation. Since the 1960s, more than half of the tropical forests in the world have been destroyed. Every year, people clear millions of acres of forest for agriculture. Trees typically take up carbon dioxide and release fresh oxygen. So it is important that you plant trees, support reforestation campaigns and hold back deforestation projects. These trees also provide food and habitats to a number of creatures, stabilize our soils thus reducing floods and provide cool areas.

To make just one cotton shirt takes some 2,700 litres of water. And clothes can take more than 200 years to decompose. Americans alone throw away 14 million tons of clothing each year with 84% ending up in landfills or incinerated. But there is so much more that you can do with broken and damaged things. You can upcycle old items into new ones like empty containers into flower pots. You can use broken pots as art artefacts in your garden. The list just goes on depending on your creativity.

You must seriously reduce your water use. Water is a precious resource that will become even more scarce in the years to come due to climate change. For example, right now, Lake Mead's water level has sunk to its lowest level since the 1930s due to bitter droughts in western US. So, it is best you harvest rainwater and use greywater for purposes like lawn irrigation, car-washing and other processes that do not require potable water. You can easily capture rainwater through roof gutters and tanks or install professional equipment. Or you can re-use greywater, for e.g., water from sinks and tubs for such tasks.

Mohammad Arif - 5A

### Sustainable Cities & Communities

*Save Today, Use Tomorrow*  
 Save Non-Renewable Resources today  
 To make tomorrow a happier and better day  
 Take part in cleaning to see people beaming  
 There can't be freaks where architecture speaks  
 Make something smart just like unusual art  
 Make something like an important term, just not infirm  
 Make a source for better life, a life to end any thrive  
 Make a brand new city so there is no pity !!

Paavni Dubey - 4C

### WATER POLLUTION

Water is an important element of human health, quality. WATER DIRECTLY AFFECTS THE HUMAN BODY. WATER POLLUTION CAUSES VARIOUS DISEASES LIKE TYPHOID, CHOLERA, HEPATITIS, CANCER ETC. WATER POLLUTION DAMAGES THE LANDS AND AQUATIC ANIMALS PRESENT IN THE RIVER BY REDUCING THE OXYGEN CONTENT FROM THE WATER.

# मेरी कलम- मेरी अभिव्यक्ति

## विद्यालय का वार्षिक उत्सव

इस वर्ष मेरे विद्यालय में वार्षिक उत्सव २७ नवंबर को मनाया गया था। इस वर्ष वार्षिक उत्सव का विषय महात्मा गाँधी जी के जीवन पर आधारित था। इस उत्सव में मेरे विद्यालय के सभी छात्रों ने बड़-बड़कर भाग लिया। इसमें सभी बच्चों ने नृत्य, गायन व झाँकियाँ प्रस्तुत की। इस उत्सव में भाग लेकर सभी छात्रों में सहभागिता, अनुशासन और आत्म-विश्वास की वृद्धि हुई। उत्सव की तैयारी एक महीने पहले शुरू की दी गयी थी।

आरव जैन - ३ अ

हमारे विद्यालय में प्रतिवर्ष वार्षिकोत्सव मनाया जाता है। हम सब इसे बहुत धूम धाम से मनाते हैं। सभी छात्र-छात्राएँ इस उत्सव में बड़-बड़कर हिस्सा लेते हैं। विद्यालय प्रांगण में भव्य पंडाल और मंच बनाकर इस उत्सव का आयोजन किया जाता है। सभी छात्रों के अभिभावकों को उत्सव देखने के लिए आमंत्रित किया जाता है। सभी छात्र-छात्राएँ किसी मुख्य विषय पर आधारित नृत्य, गायन, नाटक द्वारा सभी का मनोरंजन करते हैं। अंत में मुख्य अतिथि ने भाषण देकर सभी को प्रोत्साहित किया।

आर्या भटनागर - ३ अ

कोरोना के बाद इस वर्ष हमारे विद्यालय में वार्षिक उत्सव बहुत धूम-धाम से मनाया गया था। वार्षिक उत्सव महात्मा गाँधी जी के जीवन पर आधारित था। इसमें हम सभी विद्यार्थी मिलकर तरह-तरह के कार्यक्रम प्रस्तुत करते हैं। इसमें भाग लेकर बहुत आनंद आया था। सभी बच्चे बहुत उत्साहित थे। मंच पर जाने से पहले सब छात्र-छात्राओं का मेकअप किया जाता है जिसमें बहुत मजा आता है। इस उत्सव में भाग लेने से सभी को मंच पर जाकर प्रस्तुति देने का अवसर मिलता है।

सम्यक जैन - ३ अ

हर विद्यालय का वार्षिकोत्सव मनाने का समय और दिनांक निश्चित रहती है। २७ नवंबर को मेरे विद्यालय में भी वार्षिक उत्सव मनाया गया। यह उत्सव महात्मा गाँधी के जीवन पर आधारित था। इसकी तैयारियाँ एक माह से चल रही थी। इसको लेकर सभी छात्रों में बहुत उत्सुकता थी। आखिर वह दिन भी आ गया, जिसकी प्रतीक्षा सभी छात्र कर रहे थे। मेरी नृत्य प्रस्तुति थी। हम सभी छात्रों ने हरे एवं लाल रंग की पोशाक पहने हुए थे। सभी बहुत ही सुंदर लग रहे थे। विद्यालय को भी बहुत सुंदर सजाया गया था। इस उत्सव में भाग लेकर हम सभी में आत्मविश्वास और सहभागिता में वृद्धि हुई।

प्रिशा माहेश्वरी - ३ ब

मेरे विद्यालय का वार्षिक उत्सव हर वर्ष बहुत उत्साह के साथ मनाया जाता है। इस बार यह उत्सव २७ नवंबर को आयोजित किया गया था। इसकी तैयारी विद्यालय में १ महीना पहले से प्रारंभ हो गयी थी। इस बार का पूरा कार्यक्रम महात्मा गाँधी जी के जीवन पर आधारित था। उनके जीवन की छोटी-छोटी घटनाओं को माध्यमिक कक्षा के छात्रों ने नाटक के रूप में प्रस्तुत किया, वही हमने नृत्य के माध्यम से इनके जीवन को दर्शाया। कार्यक्रम के समापन दृश्य में सभी छात्र-छात्राएँ ने मिलकर भारत की प्रगति व इतिहास को बड़े उत्साह के साथ संगीत के माध्यम से वातावरण में देशभक्ति की भावना को भर दिया। इस प्रकार से हमारा वार्षिकोत्सव स्मरणीय बन गया।

रेयांश - ३ ब

वार्षिक उत्सव सभी विद्यालयों में मनाया जाता है लेकिन मेरे विद्यालय यानि बिल्लबोंग की बात ही अलग है। इस बार यह उत्सव २७ नवंबर को आयोजित किया गया था। इसकी तैयारी में सभी शिक्षक और छात्रों ने बहुत अभ्यास और मेहनत किया। इस बार का पूरा कार्यक्रम महात्मा गाँधी जी के जीवन पर आधारित था। सभी ने अलग अलग वेशभूषा में नाटक, नृत्य और संगीत को प्रस्तुत किया। इस कार्यक्रम का आनंद लेने के लिए हमारे माता-पिता और अतिथि आए थे। इस कार्यक्रम में भाग लेकर मुझे एकजुट होकर काम करने की सीख मिली।

आयांश सिंह - ३ब

हमारे विद्यालय में प्रत्येक वर्ष एक वार्षिक समारोह का आयोजन किया जाता है। इस दिन पूरे विद्यालय को फूलों से तथा गुब्बारों से सजाया जाता है। सभी छात्र प्रतियोगिता में भाग लेने के लिए कुछ सप्ताह पहले से ही अभ्यास शुरू कर देते हैं। शिक्षकों द्वारा प्रतियोगिता में भाग लेने वाले सभी छात्रों की सूची तैयार की जाती है। कार्यक्रम के लिए विद्यालय के मैदान में विशाल पंडाल बनाया जाता है। इस अवसर पर विद्यार्थियों के माता-पिता को भी आमंत्रित करते हैं। वार्षिकोत्सव में मुख्य अतिथि के रूप में किसी विशेष व्यक्ति को आमंत्रित किया जाता है। हर साल हमारे विद्यालय में वार्षिकोत्सव बड़ी धूम-धाम से मनाया जाता है।

अहाना - ३ स

हमारा विद्यालय एक आदर्श विद्यालय है। इसमें पढ़ाई के साथ-साथ खेल-कूद को भी महत्त्व दिया जाता है। छात्रों के विकास के लिए विद्यालय में कई प्रकार के कार्यक्रम किये जाते हैं। हमारे विद्यालय का वार्षिकोत्सव हर वर्ष नवम्बर-दिसम्बर में होता है। वार्षिकोत्सव की तैयारी दो-तीन सप्ताह पहले से ही शुरू कर दी जाती है। समारोह का आयोजन विद्यालय के विशाल प्रांगण में किया जाता है। कार्यक्रम का आरंभ सरस्वती की आराधना के साथ किया गया। प्रधानाचार्या महोदया ने वार्षिक रिपोर्ट पढ़कर सुनाई। कार्यक्रम की समाप्ति से पहले पुरस्कार वितरण किया जाता है। मुख्य अतिथि ने समारोह की बहुत प्रशंसा की।

अनेय गौयल - ३ स

विद्यालय का वार्षिकोत्सव विद्यालय की उन्नति और प्रगति का परिचायक है। विद्यार्थी और अध्यापकों, दोनों के लिए यह हर्ष और उल्लास का पर्व है। विद्यालय के वार्षिकोत्सव में भाग लेकर मुझे बहुत मजा आया। समूह नृत्य, समूह गान, सरस्वती वंदना, कव्वाली, नाटक, संस्कृत नाटिका, विचित्र वेशभूषा आदि कार्यक्रमों के लिए छात्रों ने तैयारी की। विद्यालय प्रांगण में ही भव्य पंडाल लगाया गया था। सभी छात्र-छात्राओं ने पुरे जोश से भाग लिया। चारों तरफ आनंद का वातावरण था। मझे अपने नृत्य के साथ-साथ दूर छात्रों की गतिविधियाँ देखने में भी बहुत आनंद आ रहा था। इसमें भाग लेने से अनुशासन व सहभागिता की भावना विकसित होती है।

आराध्या अग्रवाल - ३ स

हमारे विद्यालय में कुछ दिनों पहले वार्षिकोत्सव हुआ था। वह बहुत ही मजेदार था। हमारे कक्षा से बहुत सारे बच्चों ने नृत्य किया था जो बहुत सुन्दर व मनोरंजक था। सारे बच्चे खुशी से नाच और गए रहे थे। सब बच्चे रंग-बिरंगे कपड़ों में बहुत सुन्दर लग रहे थे। हमारी प्रधानाचार्या जी ने सबका हाँसला बढ़ाने के लिए भाषण दिया। मैं हर वर्ष इस वार्षिकोत्सव की प्रतीक्षा करती हूँ।

मेरे विद्यालय का वार्षिकोत्सव २७ नवंबर को था। वार्षिक उत्सव खेल के मैदान में आयोजित किया गया था। वार्षिक उत्सव के लिए विशाल मंच भी तैयार किया गया था। सभी विद्यार्थियों ने बड़ चढ़कर भाग लिया था। मुझे सबका नृत्य बहुत अच्छा लगा। इसकी तैयारियाँ एक महीने पहले से ही आरंभ हो गयी थीं। महात्मा गाँधी जी के जीवन को आधार बनाकर वार्षिक उत्सव की पटकथा तैयार की गयी थी। वार्षिक उत्सव में भाग लेकर मुझे बहुत मजा आया था।

अद्विता गुप्ता - ३ ड

इस वर्ष २७ नवंबर २०२२ को हमारे विद्यालय का वार्षिक उत्सव था। कोरोना काल के बाद विद्यालय में इतना बड़ा उत्सव मनाया जा रहा था। सभी लोग बहुत उत्साहित थे। सभी विद्यार्थियों ने इसमें बड़-चढ़कर हिस्सा लिया। हमारी कोर्डिनेटर मैम और प्रधानाचार्या मैम ने सभी बच्चों को बहुत प्रोत्साहित किया। वार्षिक उत्सव महात्मा गाँधी के जीवन पर आधारित था। सभी विद्यार्थियों ने अलग-अलग प्रकार के नृत्य-नाटक प्रस्तुत किये। सभी विद्यार्थियों के माता-पिता पूरे जोश के साथ तालियाँ बजा रहे थे। अतिथि महोदया ने पूरे कार्यक्रम की बहुत प्रशंसा की।

विआन गर्ग - ३ ड

## जल का महत्व

जल हमारे जीवन के लिए बहुत जरूरी है, इसलिए हमें जल बर्बाद नहीं करना चाहिए। कुछ लोग ये नहीं समझते हैं कि जल हमारे जीवन के लिए कितना जरूरी है? हम लोग जो कूड़ा-कचरा पानी में फेंकते हैं वो नदी के पानी को खराब करता है जो मछलियों के लिए भी सही नहीं है। अगर हमने जल्दी कुछ नहीं किया तो फिर आगे आने वाली पीढ़ी को बहुत कुछ झेलना पड़ेगा। इसलिए "जल बचाओ, कल बचाओ।"

सौमिल ठकराल - ४ अ

जल ही सबकुछ है। इसके बिना जीवन नहीं। इसका महत्व बहुत बड़ा है। जल नहीं तो पेड़ नहीं, पेड़ नहीं तो जीवन नहीं। इसलिए जल है तो कल है। हमें जल को गन्दा नहीं करना चाहिए। जल में हमें कचरा नहीं फेंकना चाहिए। पानी बचाओ ताकि आगे आने वाली पीढ़ी सही जीवन जी सके। "जल है तो कल है।"

समर्थ - ४ अ

जल के बिना कुछ नहीं है संभव।

पेड़, इंसान आदि सब खत्म।

अगर हम आज जल नहीं बचाएंगे

तो हम ही मिट जाएंगे।

नदी तालाब में क्यों

कूड़ा करकट भर डाला ?

क्यों हमारे जीवन को भस्म कर डाला ?

नदी, तालाब में कूड़ा- करकट मत डाला करो

अमृत को जहर मत बनाया करो।

अगर सारा पानी गन्दा हुआ

तो क्या पीएँगे हम

जल के बिना कुछ नहीं है संभव।

देवांश सहगल - ४ अ

हमें जल को बचाना चाहिए क्योंकि जल ही जीवन प्रदान करता है। हमें जल को गन्दा नहीं करना चाहिए। हमें नदियों को दूषित नहीं करना चाहिए।

" जल को बचाओ, जीवन को बचाओ। "

दक्ष - ४ अ

पानी है कितना अनमोल, जान लो तुम इसका मोल पानी बिना धरती है सुनी, बिन पानी जीवन का नहीं है मोल।

पानी से जीवित हैं सारे,

पानी से जीवित हैं सारे

पानी है कितना अनमोल

जान लो तुम इसका मोल।

आओ हम जल को बचाएँ,

जल से अपनी प्यास बुझाएँ।

आन्वी भसीन - ४ ब

जल है प्रकृति का उपहार

जल बिना हम सब लाचार।

जल है जीवन का आधार,

जल को न करो बेकार।

जल से ही सब जीवन पाते

जल बिना न जीवित रह पाते।

जल है कितना अनमोल

जान लो भईया इसका मोल।

जल है तो हम है प्यारे,

इससे ही तो अपना कल है प्यारे।

जल से ही हर क्षण, हर पल है न्यारे।

इसका मिलकर करो तुम मोल।

श्रुति वर्मा - ४स

जल ही सब जीवन का सार

न व्यर्थ बहाओ न करो बेकार

संरक्षण इसका करना है,

प्रदूषण से इसे बचाना है।

एकजुट होकर कार्य करें हम,

लोगों को जागरूक बनाए हम,

वर्षा जल का भंडार करें

भू जल का पुनर्भरण करें

यही विनती है मेरी सबसे

जल की महत्ता को समझे और समझाएँ,

जल को न व्यर्थ बहाएँ।

सुवीर जैन - ४स

## पर्यावरण सुरक्षा, हमारी जिम्मेदारी

पर्यावरण सुरक्षा ये धरती है प्यारी,

बचाना इसको है हमारी जिम्मेदारी।

प्रदूषण को घटाना, कचरे को हटाना,

किसी को नहीं है बनाना बहाना,

क्योंकि इस धरती को स्वर्ग है बनाना।

आओ मिलकर बने जागरूक,

और करें ये वादा,

धरती, जल और आकाश रहे स्वच्छ,

ये है हमारा दृढ़ इरादा।

मनन सिंघल - ५ अ

पर्यावरण संरक्षण के लिए हमें सर्वप्रथम इस धरती को प्रदूषण रहित करना होगा। सबसे पहले अपनी आरामदायक आदतों को सुधारते हुए अनावश्यक वस्तुओं के उपयोग को कम करना होगा। पर्यावरण प्रदूषण को रोकने के लिए हम सभी को एकजुट होकर प्रयास करने होंगे, इसे रोकने के लिए हम बैटरी और सौर ऊर्जा से चलने वाले संयंत्र और वाहनों का ही उपयोग करें। वन्य जीवों की खाल से बने उत्पादों को न खरीदें। जंगल से लाए विदेशी पालतू जानवरों को नहीं खरीदें। हमें पानी बर्बाद नहीं करना चाहिए क्योंकि पानी ही जीवन है।

पर्यावरण की रक्षा करने और पृथ्वी को बचाने की आवश्यकता और महत्व को समझने के बाद भी अगर हम अपनी ओर से कुछ नहीं करते हैं तो यह हमारी ओर से एक बड़ी गलती होगी।

समक्ष सक्सेना - ५ अ

पेड़, पौधे जल, हवा जरूरत हमारी

पर्यावरण की रक्षा जिम्मेदारी हमारी।

हर इंसान को पेड़ लगाने होंगे,

हम इंसान को पेड़ लगाने होंगे,

हम सभी को पेड़ काटने से भी बचाना होगा।

प्लास्टिक का इस्तेमाल कम करना होगा

हवा में दूषित गैसों को मिलने से रोकना होगा।

मिटटी की उर्वरता बढ़ानी होगी।

नहीं रखेंगे अगर साफ पर्यावरण को तो फैलेगी बीमारी,

पर्यावरण की रक्षा हमारी जिम्मेदारी

श्रेयांश गुलेरिया - ५ अ

पर्यावरण सुरक्षा बहुत जरूरी है और वह हमारी जिम्मेदारी भी है अगर हम पर्यावरण को नहीं बचाते हैं तो उसका नतीजा बहुत बुरा होगा। आजकल पर्यावरण बदलाव भी आने लगे हैं। जानवरों की संख्या कम होती जा रही है। जंगल भी अब उतने नहीं हैं जितने पहले हुआ करते थे। हमें प्लास्टिक का इस्तेमाल भी कम करना होगा। प्लास्टिक का इस्तेमाल कम करने से ज्यादातर पर्यावरण बच सकता है। इसका मतलब ये नहीं है कि हम जानवरों को मारते रहे और पेड़ काटते रहे। हमें इन सब चीजों से पर्यावरण को बचाना है। कचरे को इधर-उधर फेंकना और पानी की प्रदूषित होने से भी बचाना है। यह सब प्रयास करकर ही हम पर्यावरण को बचा सकते हैं।

विहान रावत - ५ ब

हमारे चारों ओर फैली सभी चीजों को ही पर्यावरण के रूप में परिभाषित किया जाता है। हमारी पृथ्वी के चारों तरफ पाए जाने वाले प्राकृतिक संसाधनों को ही हम पर्यावरण कहते हैं। यही हमारे ग्रह पर जीवन को बचाये रखने में सहायक होती है और हमें अधिक प्राकृतिक संसाधन उपलब्ध कराती है। जीवन को स्वच्छ व स्वस्थ बनाये रखने के लिए हमारे पर्यावरण का स्वस्थ व स्वच्छ रखना जरूरी है। दुर्भाग्य से हम इस उपयोगी संसाधन को प्रदूषित करते जा रहे हैं। पर्यावरण के संरक्षण के लिए हमें सक्रिय कदम उठाने चाहिए और युवा पीढ़ी को भी इसमें योगदान करने की तत्काल आवश्यकता है।

तनिषि रस्तोगी - ५ ब

पर्यावरण हमारा जीवन है, पर्यावरण हमारी जननी है। मानव वनों को काट रहा है, जिस कारण बढ़ते हुए प्रदूषण को कम करने वाला कोई नहीं है। प्लास्टिक के प्रयोग से समुद्री जीव का अंत हो रहा है। नए-नए कारखानों के बनने से वायु प्रदूषण हो रहा है, जो कई गंभीर बीमारियों तक ले जा सकता है। हमें अपने वातावरण और पर्यावरण को स्वच्छ रखना चाहिए। हमें कागज, कपड़े के बैग का प्रयोग करना चाहिए और वन नहीं काटने चाहिए।

युवराज सिंह - ५ स

पर्यावरण की सुरक्षा हमारी जिम्मेदारी है क्योंकि प्रदूषण के कारण अनेक बीमारियाँ फैलती हैं तथा चारों तरफ प्रदूषण के कारण हमारा रहना मुश्किल होता जा रहा है। इसलिए पर्यावरण की सुरक्षा हम सभी की जिम्मेदारी है। हमें अपने देश की सरकार की उनके कार्यों में साथ देना चाहिए जिससे हम अपने देश को प्रदूषण मुक्त कर सकें। हमें पेड़ पौधों को नहीं काटना चाहिए बल्कि लोगों को ज्यादा से ज्यादा पेड़ लगाने के लिए जागरूक करना चाहिए। कूड़ा सदैव कूड़ेदान में ही डालना चाहिए, गाड़ियों का प्रयोग कम से कम करना चाहिए। इसलिए हम प्रण लेते हैं कि पर्यावरण की सुरक्षा हमारी जिम्मेदारी है और हमेशा रहेगी।

आराध्या गुप्ता - ५ ब

पर्यावरण सुरक्षा बहुत जरूरी है और वह हमारी जिम्मेदारी भी है अगर हम पर्यावरण को नहीं बचाते हैं तो उसका नतीजा बहुत बुरा होगा। आजकल पर्यावरण बदलाव भी आने लगे हैं। जानवरों की संख्या कम होती जा रही है। जंगल भी अब उतने नहीं हैं जितने पहले हुआ करते थे। हमें प्लास्टिक का इस्तेमाल भी कम करना होगा। प्लास्टिक का इस्तेमाल कम करने से ज्यादातर पर्यावरण बच सकता है। पर्यावरण पर हमारा जीवन पूरी तरह निर्भर है, क्योंकि स्वच्छ वातावरण से ही स्वस्थ समाज का निर्माण होता है। पर्यावरण से ही हमें शुद्ध जल, वायु, भोजन, प्राकृतिक वनस्पतियाँ आदि प्राप्त होती हैं।

पर्यावरण के बिना जीवन की कल्पना ही नहीं की जा सकती है, क्योंकि पर्यावरण ही पृथ्वी पर एक मात्र जीवन के अस्तित्व का आधार है।

पर्यावरण की सुरक्षा, दुनिया की सुरक्षा।

प्रकृति का न करें हरण, आओ बचाएँ पर्यावरण

पेड़-पौधे मत करो नष्ट, साँस लेने में होगा कष्ट।

कशिश बंसल - ५ स

पर्यावरण की रक्षा करना हम सब का कर्तव्य है। जीवन के लिए स्वच्छ हवा, स्वच्छ पानी और स्वच्छ खाना बहुत जरूरी है। पृथ्वी ही ऐसा गृह है जहाँ जीवन संभव है। यदि हम इसे बना के रखना चाहते हैं तो हमें पर्यावरण की रक्षा करनी पड़ेगी। ऐसा कोई कार्य न करे जिससे पर्यावरण को क्षति पहुंचे।

सभी पेड़-पौधों, नदियों, तालाबों व जीव-जंतुओं से ही मिलकर यह पर्यावरण बना है। पर्यावरण हम सभी जीव जंतुओं को जीने के सभी साधन प्रदान करता है।

इस पूरे ब्रह्माण्ड में पृथ्वी ही एकमात्र ऐसा ग्रह है, जहाँ पर जीवन संभव है और ऐसा इस पर्यावरण के कारण के कारण ही संभव है।

यह पर्यावरण हमें जीवित रहने के लिए हवा, पानी, और भोजन प्रदान करता है।

सानिया रिजवी - ५ स

अगर हमें पृथ्वी को बचाना है तो पहले हमें जंगल जल और संपूर्ण पर्यावरण को बचाना होगा। हमें जंगल की कटाई अवैध रूप से नहीं करनी चाहिए। हमें ज्यादा से ज्यादा पेड़ लगाने चाहिए जिससे कि हमें शुद्ध हवा मिल सके। हमें अपने आस पास सफाई रखनी चाहिए और लोगों को भी जागरूक करना चाहिए। हमारा कर्तव्य है कि अपने देश को पर्यावरण मुक्त करें और कहीं भी गंदगी न फैलाएँ।

त्विशा - ५ स

पर्यावरण बचाओ

पर्यावरण बचाओ  
ध्वनि, मिट्टी, जल आदि सब,  
पर्यावरण हमारे।  
जीवन जगत के मित्र सभी ये,  
जीवन देते सारे।  
तब तक जीवन है जगत में,  
जब तक जग में पानी।  
जब तक वायु शुद्ध रहती है,  
सौधी मिट्टी रानी।  
तब तक मानव का जीवन है,  
यह सबको समझाओ।  
इनसे अपना नाता जोड़ो,  
इनको मित्र बनाओ।

अनिका अग्रवाल – छटी अ

## कुछ भी स्वच्छ नहीं रहा

रहा न जल पीने लायक, वायु न जीने लायक  
भूमि भी हो गई बंजर, कैसा है ये मंजर ?  
कान फोड़ती आवाजों का फैला घातक शोर,  
उर्वरकों की बीमारी का भूमि में है जोर  
पानी, बिजली की बर्बादी नित बढ़ती ये आबादी,  
कूड़ेदान बनी ये नदियाँ कलुषित हुई ये पुर्वइयाँ छ  
लुप्त हो रहे वन जंगल लुप्त हो रहे प्राणी,  
लुप्त हो रहीं नदियाँ लुप्त हो रही धानी छ  
जल, वायु और ये भूमि कुछ भी स्वच्छ अब रहा नहीं,  
रोग मिल रहे ऐसे ऐसे जिनकी कोई दवा नहीं छ

अक्षया – छटी अ

## मेरा देश मेरी शान !

इस देश से ही मेरी पहचान है,  
यही मेरा दिल मेरी जान है।  
है यह मेरा भारत जो कि महान है,  
यहाँ रहते हर कौम के इन्सान है,  
हाँ यह मेरा हिंदुस्तान है।  
लड़ते सुबह एक होते हर शाम है,  
उगती हर फसल उगते यहाँ धान है,  
हाँ यह मेरा हिंदुस्तान है।

फलक – सात

## भारत मेरा देश महान

भारत मेरा देश महान।  
हम को है इस पर मान।।  
यह रंगों से भरा और त्योहारों से खिला।  
भारत मेरा देश महान हम को है इस पर मान।।  
यहाँ सबसे प्राचीन है संस्कृति,  
और विकसित है सभ्यता।

भारत मेरा देश महान हम को है इस पर मान,  
यहाँ माता – पिता है भगवान और अतिथि है देवता के समान,  
भारत मेरा देश महान हम को है इस पर मान।।  
हमने दिया संसार को दशमलव का ज्ञान,  
कला, विज्ञान और पथ प्रदर्शन का प्रमाण  
भारत मेरा देश महान हम को है इस पर मान।।

हमने विश्व का किया आयुर्वेद से उपकार,  
और किया योग का प्रचार।  
भारत मेरा देश महान हम को है इस पर मान।।  
हम हैं विश्व के सबसे बड़े लोक तंत्र।  
यहाँ अनेक भाषाएँ, धर्म, जाति में न कोई अंतर,  
भारत मेरा देश महान हम को है इस पर मान।  
हम जिस पर जान कुर्बान करते हैं, इसे हम देश नहीं माँ कहते हैं।

समृद्धि नोहरिया – सातवीं अ

## Petit-déjeuner

Les Indiens mangent du pain avec du beurre/ de la confiture au petit-déjeuner avec du lait ou du thé.

## Déjeuner

Ils mangent du dal makhani, du rôti, de la salade et du riz pour le déjeuner. Ils prennent aussi du lassi quelquefois.

## Goûter

Pour le goûter, ils mangent du samosa, des frites, des biscuits, etc.

## Dîner

Pour le dîner, ils ont du poulet avec du rôti et du jalebi pour le dessert.

Aaryan Flynn - VI B

## Le Matin - Le Petit-déjeuner

Les Indiens mangent des parathas et des légumes. Ils boivent du thé. Les jeunes prennent des céréales et des fruits. Le weekend, ils mangent des pâtes.

## L'Après-midi - Le Déjeuner

Au déjeuner, beaucoup d'indiens sont au bureau. Ils déjeunent au bureau, à la cantine ou au restaurant. Ils mangent du riz et des légumineuses, des parathas ou des salades. Les jeunes mangent à la maison ou à la cafétéria de l'école. Ils mangent du riz, des légumes, du parantha et du beurre ou du ketchup. Ils mangent un repas complet.

## Le Soir - Le Goûter

Les adultes boivent du thé. Les jeunes prennent du pain et du beurre, des biscuits, du lait, des fruits..

## Le Nuit - Le Dîner

Au dîner, toute la famille est à la maison. Ils prennent de la soupe, de la viande, des légumes, du poisson, du riz, des légumineuses, du paratha. Les adultes boivent souvent du vin au repas.

## Le Passe temps et les sports favori

Naysha Jindal - VII A

Je m'appelle Naysha Jindal, J'ai douze ans. J'adore jouer de la guitare. Je suis amoureux de la mélodie. Le mardi et le lundi, je joue de la guitare.

Shivangi Alsisaria - VII A

J'aime nager. C'est assez rafraichissant et bon à faire en été.

Eh bien, le jogging n'est peut-être pas le meilleur mais c'est très utile. Il améliore votre physique.

Je trouve le golf relaxant et un jeu où je peux frapper avec mon club de toute ma puissance sans craindre d'être pris au dépourvu.

Les cartes peuvent être jouées n'importe où et n'importe quand. Son tout âge appropriés.

Aryan Rohilla - VII B

Bonjour à tous, Je m'appelle Aryan. J'ai douze ans. J'aime jouer au cricket, au tennis de table et au tennis sur gazon pendant mon temps libre. Mon sport favori est le tennis. Pendant mon temps libre, j'aime étudier le français, les mathématiques, anglais et la science.

Swayam Verma - VII C

Mon sport favori est le golf. J'aime le golf parce que c'est un jeu de solo et c'est simple. Dans ce jeu, nous utilisons un club pour lancer une petite balle. Le but est de lancer la balle dans un petit trou creusé à cet effet. C'est amusant de jouer à ce jeu. Ce jeu améliore également votre objectif. En outre, il est plus sûr que la plupart des jeux et il est moins risqué.

Daivik Tiwari - VII C

Le cricket est un jeu de batte et de balle joué entre deux équipes de onze joueurs sur un terrain au centre duquel se trouve un terrain de 22 mètres avec un guichet à chaque extrémité, chacun comprend deux bails en équilibre sur trois souches.

## Le Mystère de Benjamin

Il était une fois un monsieur,  
 qui a habité avec beaucoup de bonheur.  
 Il avait beaucoup de connaissances  
 depuis le moment de sa naissance  
 Les gens s'adorait comme l'un des plus grands  
 et ils voulaient apprendre.  
 Alors ils ont appris les principes de cet homme  
 mais a fait l'erreur de demander son nom.  
 Il a décollé et a disparu le lendemain,  
 il a laissé une note signé Benjamin.  
 La note dit qu'il sera bientôt de retour,  
 comme c'était eux qui il était né pour.  
 Il a dit que leur village était en danger,  
 ses principes les sauveront de venir étrangers.  
 Saihaj Singh Ahluwalia

## L'ENSEIGNEMENT ENLIGNE

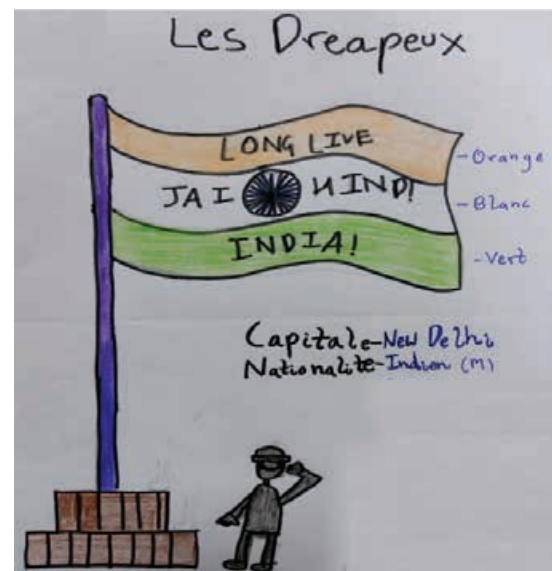

Bonjour tout le monde. Aujourd'hui, je parlerai sur le sujet, l'enseignement en ligne  
 COVID-19 nous a tous initiés à l'apprentissage en ligne.  
 Le système éducatif a évolué et continue de se développer. Le confinement nous a obligé à trouver un moyen de continuer à apprendre sans aller à l'école. C'est à ce moment-là que nous avons commencé à utiliser les plateformes d'apprentissage en ligne. L'apprentissage en ligne présente à la fois des avantages et des inconvénients.  
 Cela peut conduire à un manque de relations élèves-enseignants, mais c'est une bonne alternative en cas de besoin.

Kimaya Arora  
 XA

## Le Printemps

L'air est doux et léger,  
 L'herbe vert pousse et s'allonge,  
 Les oiseaux chantent leurs mélodies,  
 Tandis que le jour devient plus long.  
 L'été, le soleil est à son apogée,  
 Le ciel est bleu comme la mer,  
 Les vacances sont dans l'air,  
 Et nous sommes libres pour explorer.  
 L'automne, la nature se teinte de rouge,  
 Les feuilles tombent du ciel,  
 Les températures deviennent plus fraîches,  
 Et l'on se prépare pour l'hiver.  
 Hiver, les nuits sont longues et froides,  
 La glace remplit les ruisseaux,  
 La neige est partout où l'on regarde,  
 Et les couleurs sont plus douces.

## Meine Familie

Mein Name ist Illisha. Ich habe eine wunderbare Familie. Mein Vater ist Modedesigner. Er ist der beste Vater der Welt. Er ist sehr nett, hilfsbereit und lustig. Immer wenn er Zeit hat, spielt er mit mir.  
 Meine Mutter ist Hausfrau. Sie ist sehr fleißig und liebevoll. Mein Großvater ist auch sehr süß und freundlich. Er arbeitet bei Kohlebergwerken.  
 Meine Großmutter erzählt mir Geschichten. Ich bin sehr dankbar, dass ich diese Familie habe. Ich wünsche, jeder auf der Welt eine Familie hätte.

ILLISHA MITRA (GRADE-5C)

## Diwali, Fest der Lichter

Diwali ist für Hindus das wichtiges Fest im Jahr. Bei dem Diwali kommen Familien und freunde zusammen. An Diwali feiern die Hindus in Indien den Sieg des Guten über das Böse, des Lichts über den Schatten, der Wahrheit über die Lüge und des Lebens über den Tod. Das Fest findet jedes Jahr zwischen Oktober und November statt. Im Kreis der Familie wird ein Festmahl genossen, kleine Geschenke ausgetauscht und Öllampen angezündet und mit Feuerwerk gefeiert. Diwali wird im ganzen Land gefeiert, allerdings mit unterschiedlichen Traditionen und Schwerpunkten. Diwali ist eine Zeit der Familie und der Gemeinschaft.

SANAYA JAIN (GRADE-5C)

## Meine Beste Freundin

Ich habe viele Freunde, aber meine beste Freundin ist Nimisha. Sie ist sehr nett, süß, hübsch und hilfsbereit. Mit ihr kann ich stundentlang quatschen, lachen, weinen und mit ihr ist die Welt so viel bunter und schöner. Wenn ich meine Probleme erzähle, hilft sie mir immer in schwierigen Zeiten. Mit Hilfe von Freunden können sie schlechte Tage in ihrem Leben erleben. Ein Freund ist Jemand, der deine Vergangenheit versteht, glaubt an deine Zukunft und akzeptiert dich so wie du bist.

TVISHA KAUR (GRADE-5C)

# NEW YORK

Ich möchte nach New York, das in den USA liegt. Ich möchte das wunderbare Museum, den Central Park und die Freiheitsstatue besuchen und mir die wunderschöne Landschaft und die Gemälde ansehen. Fahren Sie mit der U-Bahn und haben Sie Spaß.

Anshika Rawat (Grade-7C)

## THE CHRONICLES OF DISCOURSE

'The Chronicles of Discourse' Chapter 7 was recently concluded with much grandeur and perfection at Billabong High International School, Noida on 5th August, 2022.

The Chronicles boast of an assortment of well thought out, set of events that aim at nurturing the 21st century skills of the learners- Engaging in discourse, communicating their point of view and analysing the world around with a broader and newer perspective to harness and channelise the talents of young budding learners.

The symposium consisted of six segments: Debate: Point- Counterpoint for grades X-XII, Panel Discussion: Talk it out for grade X, Radio Star for the learners of Grade VI and VII, Monologue: The Glib Dramatist! for Grades VIII- IX and Storytelling: Fiction Factory for Grades IX and News of The hour

The learners of the debate had an engaging session on the theme 'The youth are demanding equitable opportunities to address multifaceted challenges: GenZ emerging as the Sustainability Generation, socially aware and environmentally responsible'. The Panel discussion and Radio Show too saw some wonderful presentations and entries by the learners. This apart, the online video entries for The Monologue, Fiction Factory and News of the Hour made for some engrossing ventures as each learner put on their thinking caps.

## SCHOOL EVENTS

Sensing Imagery

Poet Eloquent

Math miracles Grade 3 was organized on 31st August '22 with the objective to enable learners to experience real life connect through concrete application by applying knowledge and skills learned in the classroom. The presentations included comparing prices of air conditioners food items, pictorial number stories based on the mathematical operations used in daily life. Many learners created Puzzles on the year of birth using various mathematical concepts like place value, face value, Roman Numbers, odd and even numbers and the four mathematical operations

## Unveiling scientific curiosity... Constructrama

The important thing in scientific experiment is not so much to obtain the fact but to discover new ways of thinking about them.

- Sir William Bragg

Keeping in mind the inquisitiveness of our budding scientists Billabong high international school, Noida has organised a weekly science fest Constructrama- Unplug to sustain for grade III-V, with the aim to develop the scientific temperament and real life connect to the scientific phenomenon, nurturing their intellectual curiosity.

## Apprising About Road Safety

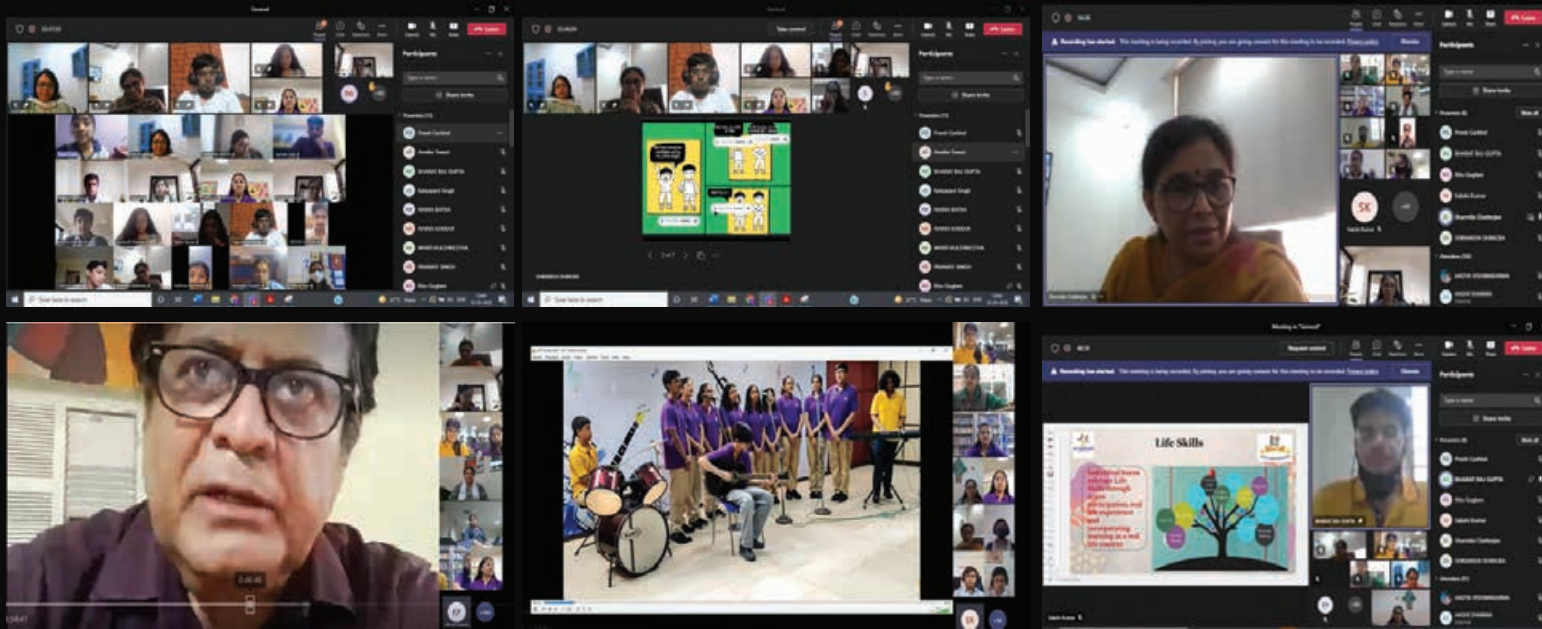

It is rightly said that "Road Safety is not only everyone's responsibility, but my responsibility first." The learners of Billabong High, Noida, in complete concurrence with this thought, successfully observed the 'Road Safety Week', from May 17, 2022 till May 20, 2022. To create an immediate visual impact on the audience, our learners participated in the poster making activity and created posters to provide visual, colorful and simple ways to communicate the issue of maintaining road safety. The learners organized a 'prabhat pheri' (a morning walk campaign), throughout the neighborhood of Sector 34. The learners organized a special assembly in which they presented their well-crafted presentations in the form of a self-composed poem, speeches and some strategies to be safe on the roads. The assembly was further glorified by a 'Nukkad Natak' presentation by our enthusiasts.

## AEP - Adolescent Education Program

Billabong High International School, Noida in collaboration with Expressions India- National Life Skills, Value Education and School Wellness Program organised the sixth chapter of Adolescent Education Orientation Programme on 12th and 13th May, 2022. The theme of the programme was "Coping with and adapting to uncertainty leads to transformation- Fostering hope, mindfulness and enhancing Life Skills to navigate through contingencies." The Adolescent Education Orientation Program (AEP) is a significant initiative that aims to empower the adolescents to make informed choices, promote healthy attitudes and develop skills to enable them to respond to real life situations in positive and responsible ways. As schools we need to build the values that help them make informed decisions, solve problems, think critically and creatively, communicate effectively, build healthy relationships, empathize with others, and cope with managing their lives in a healthy and productive manner. With National Education Policy as the guiding principles wherein, special emphasis has been given to imparting Life Skills to learners, it becomes imperative for all schools to ensure the same. The program was inaugurated by Dr. Jitendra Nagpal, Senior Psychiatrist and Head of Institute of Mental Health and Life Skills Promotion and Institute of Child Development and Adolescent Health at Moolchand Medcity. He is also the Program Director of Expressions India, who also presented the keynote address on the occasion.

## Fire and Evacuation Drill...Protecting against the uncertain

## CAL (CITY AS LAB)...

Projects undertaken by students to engage in authentic inquiry and reserach using their city as laboratory. It serves as a platform to discover the ability to reason

City as Lab (CaL) is founded with the belief that there is a researcher in every child! CaL.. is an annual, city-based research project undertaken by school children which is culminated in a one-day conference event. The purpose of CaL is to engage children in authentic inquiry and research using their city as a laboratory. CaL gives children an opportunity to discover their ability to reason, to think critically, to work collaboratively, but most importantly, to understand their city as participatory citizens. Projects taken up:

1. Story Project: Resurgence: In the Wake of the Pause Button...
2. Research Project: What impact does the validation from the social media platforms have on the self-esteem of the youth?

## Fostering the creative potential – NEP

Projects undertaken by students to engage in authentic inquiry and reserach using their city as laboratory. It serves as a platform to discover the ability to reason

## GRIHA - Green Rating for Integrated Habitat Assessment

- Billabong learners presented a Nukkad Nataka on the occasion of Paryavaran Rakshak Week at India Habitat Centre, New Delhi

## Investiture Ceremony... Shouldering responsibilities

“Leadership and learning are indispensable to each other.”

Billabong High International School, Noida hosted its Investiture Ceremony for the student and the school council for the academic session 2022-23 on August 10, 2022. The occasion was graced by the presence of the honourable principal of the school Ms. Sharmila Chatterjee. The event witnessed the young Billabong learners, the newly elected student and school council members, chosen after rigorous and democratic process of nomination, campaigning, interviews, teacher recommendation and finally voting, brimming with a sense of duty and responsibility as they received their badges for their respective positions in the council. The aim of election of the student and school council primarily is to, inculcate in the young learners and future citizens of the country, values like confidence, honesty, humility, focus, vision, courage and the compassion to listen to others. The event also witnessed the council members pledging to abide by the rules and regulations of the school and work towards the welfare of all. The learners also intently listened to the motivational words of the principal of the school as she inspired them to be great future leaders. The event ended in learners being in high spirit as they donned the mantle of responsibility.

## Oath Ceremony on Road Safety -

To commemorate the contribution of the iconic Netaji Subhash Chandra Bose in Indian struggle for independence, Billabong learners spread the message of safety on roads by forming human chains

## Pariksha Pe Charcha...

## Workshop on AQI (Air Quality Index) by TERI

SAAS for Eco Club students. The workshop aimed at generating the awareness on air pollutants (primary and secondary), harmful effects on humans and how ill effects can be curbed through precautions

## Secret to getting ahead is getting started... University Fair

Billabong High International School, Noida with the vision to empower learners with knowledge and understanding about various career options and foreign universities offering the desired courses, hosted a university fair in association with KIC-UNIVASSIST for learners of grades IX-XII on 31st August, 2022. The objective of the fair was to provide awareness about conventional and non-conventional fields and career options to learners for pursuing graduate studies, thereby enabling them to make informed decisions.

Key highlights of the fair were discussions around:

- Importance of career counselling and making informed choices.
- The transitions and evolution of careers through the years and possible trends going forward
- The road map and possible options to reach the career goal.
- The key characteristics and traits required to pursue a desired career.

The learners got the opportunity to interact with representatives from various U.S and U.K. based universities. Some of them were: Bard College, Binghamton University, California Baptist University, Columbia College Chicago, Griffin Denison University, Indiana University Bloomington, Merrimack College, Niagara University, Portland State University, Roger Williams University, University of California Los Angeles (UCLA) Summer Sessions, University of Florida, The University of Oklahoma, University of Pittsburgh and so on SLIDE.

# LIFE SKILLS...

## STRONG FOUNDATION TO CREATING 21ST CENTURY LIVES

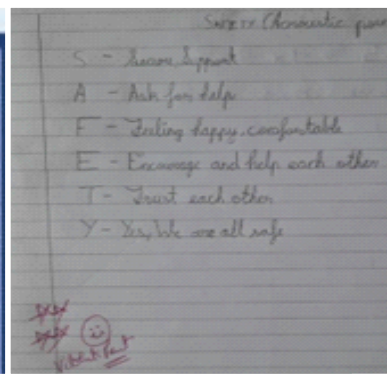

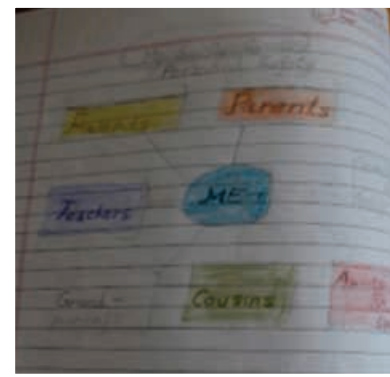

### Safety Week:

Child Safety and wellbeing is at the forefront of BHIS environment. With the same in mind, during 14th-21st November 2022, child safety week was observed and activities were done across grades 1-5 during the life skills periods pertaining to the same. Through these sessions, the meaning, and types of safety along with personal safety in detail were discussed. Learners created their own safety circles to establish individuals with whom they feel safe and comfortable. A Safety acronym was also created in collaboration with the learners.

### Maintaining Personal Hygiene Workshop

A healthy mind resides in a healthy body- with this as the basis, sessions on Maintaining personal hygiene were conducted with learners of grade 6 and 7 by the school counsellor. The sessions focused upon types of and importance of personal hygiene along with ways of establishing personal hygiene. Queries of learners were then taken up. Mental health and well-being are an important part of our curriculum and with the same in mind workshops on Interpersonal Relationships and Emotional Regulation as well as Effective Study skills were conducted by Dr. Pooja Shivam Jaitly for learners of Grade 7 and 8. During this, varied aspects were focused upon, starting with the meaning of interpersonal relationships and its significant elements. The circles of relationships and emotional regulation and strategies for the same were also discussed along with discussing about the 'Circle of Control'- aspects that are in our control and aspects that are not in our control. Throughout the workshop, the learners were participating enthusiastically and responding to the discussion with their experiences as well as any other queries.

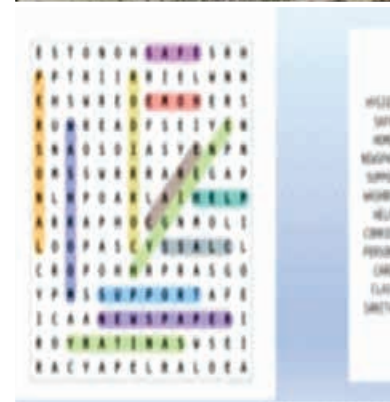

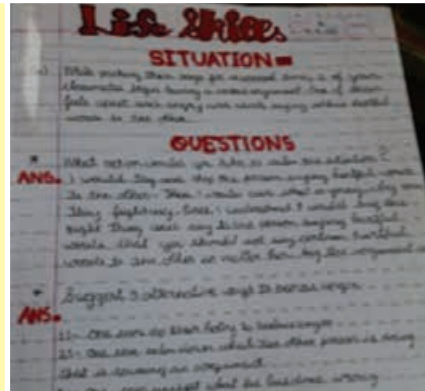

### Peer Educators

Learners are motivated to be the change makers and take ownership of bringing positive change in agetates /peers, school community, society. At BHIS, peer educators enhance the reach of the program and are like catalyst in the system. They created a chain of positive transformations. When it comes from peers it is much more acceptable and relatable. This serves as the key achievement of the program. Peer Educators have been trained by Expressions India and inhouse regular training sessions. The key change makers are working relentlessly to make the Peer buddy. Peer leaders, Peer Mentors. We expect soon to build a community with youth resilience.

The peer educators also took part in CBSE Adolescent Summit on Life Skills, Mental Health, Safety and Well-Being, 2022 as part of which a short film Connect with Yourself created by BHIS- was shortlisted by CBSE. It was based on the theme Meditation- Cultivating a mind-body Harmony, looking at the oneness that can be established through connecting with our emotions and the nature around us. Our emotions are a significant part of creating a healthy mind-body connection. The film shed light on the ways in which gaining awareness about the ways in which emotions impact us and are in turn impacted by the world around us, can help us feel better equipped to navigate through them.

Life Skills is a significant part of BHIS. It is taken up with utmost importance with dedicated place in time table with weekly classes. Life skill sessions are taken up keeping in mind the psycho social development of the learners.

The activities are designed in a manner to give experiential learning which varies from Role Plays, Debates, Explorations, puzzles, discussions, story building and so on to discuss the issues. The topics are picked to facilitate building of holistic wellbeing and coping skills. The objective is to enhance the acceptance of diversity and adaptability of learners. During holidays also, learners enthusiastically created their gratitude books and bonding time journals.

# UNCEASED ADRENALINE RUSH... FUN AND FROLIC ADVENTURE

The annual excursion for the learners of Grade IV to Grade IX was planned to Rocksport Adventure Camp. The trip that was spread over an entire day saw the learners participating enthusiastically in the various adventure sports lined up for them at the venue. From rock climbing, to zip lines, to crazy maze games to trudging on the tractor for a ride, they made a plethora of memories had fun to the hilt. The teachers were not spared too as they showed their spirit in the tug of war, rock climbing, a shot at some pottery amongst a host of other activities. The day culminated with lots of peppy music and dance even as the learners spent the day with some good food and healthy sports!

# RANTHAMBORE NATIONAL PARK

BHIS HIGH International  
Online

Heartfelt gratitude to all the teachers and staff for executing this excursion flawlessly. Highly appreciate the tireless effort and commitment to the cause. kudos to team BBH warm regards

Wonderful wonderful wonderful trip arranged by the school! Three cheers for the organizers and school along with teachers accompanying the learners! Hip hip hurray!  
Hip hip hurray!  
Hip hip hurray!

Thank you BHIS for arranging such a fun filled trip! The children enjoyed to the fullest. Lovely arrangements made. Special thanks to all the teachers who accompanied the learners and taking so much care of them, also keeping us posted and sharing pictures. Much gratitude!  
Thank you once again! 🥳👍

🙏 Many Many Thanks 🙏 to all the **teachers and organisers** for making this trip a lifetime experience for the kids! 🥳

And thanks for making us a part of it by sharing videos and pictures. 🥳🥳

I believe this will be me a memory to rejoice through out the life of our Children.

It was a memorable trip to Ranthambore for the learners of Grade XI and XII where they had stunning views of the fort, exotic jungle safaris, spending time with the locals and learning about their culture and cuisine. The three-day journey had everything to savour- breathtaking landscapes, music and dance and most of memories for a lifetime.

# Digi-Age of the future... STEAM Education

Advances in automation, artificial intelligence and robotics, while increasing productivity, will also cause major upheavals to the workforce. STEM education is undoubtedly the need of the hour that could help students evolve from being users of technology to innovators. STEM education is one of the new buzzwords in the Indian education ecosystem that deals with the focus on Science, Technology, Engineering and Mathematics. Through STEM Lab, young minds can give shape to their ideas through hands-on do-it-yourself mode, and learn innovation skills. STEMROBO is on a mission to build an ecosystem focused on leveraging technology in education where STEAM, Robotics, Coding & Artificial Intelligence are utilized as crucial tools for kids to become smart in their academics and be able to solve real-world problems in the 21st Century.

# CELEBRATIONS ON THE GO

## Independence Day Celebrations

## Republic Day Celebrations

## Rendering the hidden language of soul... Spic Macay

Billabong High International School, Noida proudly welcomed Padmashree Guru Geeta Mahalik on 29th April 2022. Guru Geeta Mahalik enthralled the spectators with her mesmerizing performance. She held an interactive session with the students and explained various dance forms and the relevance of mudras. The learners satisfied their inquisitive minds asking intriguing questions about her life and journey towards success. Padmashree Guru Geeta Mahalik along with her associates was felicitated by Director Ms Jasmine Gandhi, Principal Ms Sharmila Chatterjee, PTA representatives and student representatives. This platform provided an excellent opportunity to the young learners of Billabong High International School to interact and learn from such a renowned exponent.

## Hindi Diwas...

# CAPACITY BUILDING PROGRAM

## MENTORS BROADENING HORIZONS FOR BUILDING ON TEACHING LEARNING PROCESS...

**NPST- Teaching with 21st century skills**  
 The Teaching Faculty across Grades at Billabong High International School, Noida actively participated in the National Professional Standards for Teachers (NPST) workshop conducted by NCTE- National Council for Teacher Education, a premier organization looking after teacher education in the country. It defines the work of teachers and makes explicit elements of high-quality, effective teaching in 21st century schools that will improve educational outcomes for students. Teachers and other stake holders engaged themselves on this digital platform to share their views regarding Core Values and Ethics, Professional knowledge and understanding, Professional Competence and practice and Professional development and growth. The expected skills from teachers will be according to the new school education system levels mentioned in the National Education Policy (NEP) 2020.
